

SOCCER ROBOT

SPORT & INNOVATION

This six-legged Soccer Robot comes as a construction kit. Assembling the robot already brings a lot of fun.

Next you can go ahead and play a match with your own Soccer Robot.

The front of the robot has a mechanism which guides the ball during the match.

The Controller has two switches to control the motors, which send the robot in any direction you like.

Included:

- Mechanical Kit (available in different colors)
- Wired control
- Educational manual
